

CIS 322 Test Plan
Project by Edward Szczepanski
Tested by Samantha Mintzmyer

Project Installation:

1-Pass
2-Pass
3-Pass
4-Pass
5-Pass

Creating the initial users

1-Pass
2-Pass
3-Pass
4-Pass

Notes:

Access to add an asset, facility, and get an asset report appear on the login page and do not require me to login to access them.

Login to the system

1-Pass
2-Pass
3-Pass
4-Pass

Add two Facilities

1-Pass
2-Pass
3-Pass
4-Pass

Notes

Add facility lets you add blank entries, or entries missing any of the 3 params

Add two Assets

1-Pass
2-Pass
3-Pass
4-Pass

Notes

Add assets lets you add blank entries, or entries missing any of the 3 params

Complete the Asset Transit process

1-Pass
2-Pass
3-Pass
4-Pass
5-Pass
6-Pass

7-Pass

8-Pass

9-Pass

Notes

Dropdown labeled "Asset Tag" actually has the asset's description, not the tag

Transfer request lets you select "from" a facility the asset isn't at

Transfer request lets you transfer to the facility it's currently at

Update transit lets you select a load date earlier than the asset was added

Update transit lets you select a unload date earlier than the load date

Dispose of an Asset

1-Pass

2-Pass

3-Pass

Overview:

Great work! All tests passed, basic functionality is achieved! I dug a little deeper in a few places, often because I'm mindful of those areas in my own app-making the transfer logic idiot proof for instance. Nice job overall, the app looks sharp and the code looks clean.
